

Software for data acquisition and analysis in preclinical studies

At NOTOCORD®, we strongly believe that providing high-standard products and services to demanding business lines and research environment is the key that keep us working together year after year.

WHO WE ARE

Created in 1989, NOTOCORD® is a **leading software publisher for data acquisition, analysis, display & reporting for Preclinical research** with more than 1500 licenses installed worldwide in the major pharmaceutical companies, CROs, hospitals, public and academic research centers. Our software platforms are used every day by top scientists.

With over **160 modules and applications** available for online analysis, display and data review, NOTOCORD® provides trustworthy solutions for **customized** studies.

Cardiovascular | Respiratory

Electrophysiology | Nervous system

Discovery | Safety | Pharmacology | Toxicology

WHAT WE DO FOR YOU

Our expert teams are dedicated to bringing you the best and the most appropriate solutions. We understand that powerful and reliable software tools make a real difference in the competitive Life Sciences environment.

- **Our Sales team** often is your primary contact. They listen to your needs and help you define the best solution for your experiments. They stay in touch with you for any subsequent query.
- **Our Product team** understands your requirements and translates your demands into technical specifications. They also identify new trends for improving analysis efficiency.
- **Our Design team** develops algorithms and modules, integrating technical specifications and innovative methods to provide you with state-of-the-art software technologies.
- **Our Support team** is devoted to bringing you fast and effective assistance, support and guidance in solving any technical difficulty you could be facing.

INSTALLATION

We manage on-site and remote installation of hardware and NOTOCORD® software, in standard, GLP or customized environment.

It includes pre-installation support, integration with existing equipment as well as assistance in building the acquisition and analysis configuration.

TRAINING

Should you be a new customer or a regular user, our technical experts will deliver a comprehensive 1 to 3 days training adapted to your needs.

Always delivered in small groups, our trainings are custom-made and can be focused on any part of the software.

VALIDATION

For regulated activities, data production systems must be validated to guaranty data accuracy, reliability, integrity, availability and authenticity. NOTOCORD® delivers complete service and documentation packages for **compliance with GLP / 21 CFR Part 11 regulation.**

We provides two different validation offers:

- Consulting for the initial validation process of NOTOCORD-hem™ Evolution
- Assistance for validation of an upgraded version of our software

MAINTENANCE

NOTOCORD® offers software maintenance services including technical support, consulting and diagnosis, software updates and corrections, Microsoft Excel® expertise and on-site support. Our maintenance service packages are provided on a renewable annual basis.

QUALITY ASSURANCE / CERTIFICATIONS

NOTOCORD® is certified **ISO 9001** for "Design and Development of Data Acquisition and Signal processing Software" since 2001. From specification to in-house testing, our software development process has been improved and controlled year after year.

NOTOCORD® is a **Microsoft Certified Partner** company since 2005. This program recognizes our expertise and rewards our company for our development through Microsoft environment.
